List of Contents

NUMBER 1

Residual nutation angle of satellites with viscous nutation dampers
Jia-zhen Hong 1

Ultra-high angular resolution measurements in X-ray astronomy by means of occultation techniques
K. S. Wood and J. V. Breakwell 9

Firing tests of models of several Ariane 4 launch vehicle configurations
Daniel Lourme 17

Propulsion and staging considerations for an Orbital Sortie Vehicle
Robert F. Stengel 29

A simple analytic method for the evaluation of the performance of a radio-location system
O. Zarrouati 35

A regenerable carbon dioxide removal and oxygen recovery system for the Japanese Experiment Module
K. Otsuji, M. Hirao and S. Satoh 45

Spacelab experiments on space motion sickness
Charles M. Oman 55

Space motion sickness preflight adaptation training: preliminary studies with prototype trainers
D. E. Parker, J. C. Rock, H. E. von Gierke, L. Ouyang, M. F. Reschke and A. P. Arrott 67

EX MUNDO ASTRONAUTICO
I.A.A. Membership List 73

NUMBER 2

On the accuracy of modelling the dynamics of large space structures
Cheick Modibo Diarra and Peter M. Bainum 77

Mechanism of steady-state burning of composite solid propellants including those with negative pressure-exponents
Xu Wengan, Li Baoxuan and Wang Kexiu 83

Advanced hybrid rocket motor experiments
P. A. O. G. Korting, H. F. R. Schöyer and Y. M. Timnat 97

The Venus Radar Mapper Mission
S. S. Dallas 105

The visual stress model—A psycho-physiological method for the evaluation of operational reliability of pilots and cosmonauts
H. Kammel and H. Haase 125

Economic equity and international cooperation: the example of E.S.A.
J. M. Contant, G. Dondi and J. Ph. Boissin 133

NUMBER 3

Translatory motions about long bodies
E. H. Lemke 141

Fracture mechanics aspects of composite materials
H. W. Bergmann, H. Eggers and J. Awerbuch 149

Damping of composite plate for space structures: prediction and measurement methods
M. Marchetti, F. Morganti, L. Mucciante and C. Bruno 157
The optimization of earth orbit reentry vehicle configurations
Zhou Qicheng and Wang Zhonglian 165
The automatic generation of digital terrain models from satellite images by stereo
Paul R. Cooper, Daniel E. Friedman and Scott A. Wood 171
Quasat program: The ESA reflector
G. G. Reibaldi and M. C. Bernasconi 181
Anthropology and the humanization of space
Ben R. Finney 189

NUMBER 4

Navigation and orbit computation aspects of the ESA NAVSAT system concept
K. F. Wakker, B. A. C. Ambrosius, H. Leenman and R. Noomen 195
Optimal transfer from the equilateral libration points
Mihai Popescu and Tina Popescu 209
The Orbit-on-Demand and Shuttle II studies at NASA Langley
James A. Martin and Charles H. Eldred 213
Electrostatic potential and density estimation around an ionospheric satellite
I. M. de Moraes, H. U. Pilchowski and N. S. Venkataraman 225
Approaches to the utilization of space for CO_2 research
P. Glaser, J. Aronson, A. Brecher, K. Csigi, R. McArthur, H. Ojha, W. Sykes, P. von Thuna, R. Vranka, M. Bradford and C. Case 231
The large-scale manufacturing of electronic and electrical components in space
Douglas R. Sparks 239

NUMBER 5

Dr E. A. Roth's contribution to astrodynamics
G. Janin 245
Analytical dispersion analysis of a strategy of orbital manoeuvres
Ph. Escudier 249
Breakup of evaporating/burning slurry drops by additives
P. Roy Choudhury and M. Gerstein 253
Novel extraterrestrial processing for space propulsion
K. Ramohalli, W. Dowler, J. French and R. Ash 259
Marangoni-convection in a spherical liquid system
Helmut F. Bauer and Werner Eidel 275
Spacelab life sciences flight experiments: an integrated approach to the study of cardiovascular deconditioning and orthostatic hypotension
F. Andrew Gaffney 291
Erratum 295
List of Reviewers 296

NUMBER 6/7

SPACE: NEW OPPORTUNITIES FOR ALL PEOPLE

Geometric and radiometric performance evaluation methods for Marine Observation Satellite-1 (MOS-1) verification program (MVP)
Korehiro Maeda, Masahiro Kojima and Yoshio Azuma 297

Satellite remote sensing of inland waters: Lake Balaton and Reservoir Kisköre
Gy. Büttner, M. Korándi, A. Gyömörei, Zs. Köte and Gy. Szabó 305

Characteristics of the Gregory Rift (Kenya): Dynamics, ground structural analysis and remote sensing
Gerard F. Vidal 313

A new approach of POGO phenomenon three-dimensional studies on the Ariane 4 launcher
G. About, P. Bouveret, C. Bonnal, N. David and J. C. Lemoine 321

Effects of transient propellant dynamics on deployment of large liquid stages in zero-gravity with appliction to Shuttle/Centaur
R. E. Martin 331

Stirling Space Power Demonstrator Engine test/analytical comparison
George R. Dochat 341

Preliminary experiment on LOX/LH2 high pressure expander cycle engine
N. Tanatsugu, Y. Naruo and K. Suzuki 347

The U.K. ion propulsion programme: past status and new results
D. G. Fearn, A. R. Martin and A. Bond 353

Laser thermal propulsion using laser sustained plasmas
D. Keefer, San-Mou Jeng and R. Welle 367

The effect of pressure exponent on temperature sensitivity
R. E. Hamke, M. T. Gaunce and J. R. Osborn 377

Improving the active vibrational control of large space structures through structural modifications
F. Eastep, N. Khot and R. Grandhi 383

On the optimal station keeping control of halo orbits
C. Simó, G. Gómez, J. Llibre, R. Martínez and J. Rodríguez 391

Optimal trajectories for aeroassisted noncoplanar orbital transfer
A. Miele, V. K. Basapur and W. Y. Lee 399

Necessary conditions for maximax problems with application to aeroglide of hypervelocity vehicles
Nguyen X. Vinh and Ping Lu 413

Initial attitude determination for the HIPPARCOS satellite
Jozef C. Van der Ha 421

Active nutation control of spacecraft using gimballed momentum wheel
C. Murakami and A. Nakajima 435

A microgravity isolation mount
D. I. Jones, A. R. Owens and R. G. Owen 441

Stability of liquid bridges. Results of SL-D1 experiment
I. Martinez 449

Double diffusive instabilities and the Soret coefficient measurement under microgravity conditions
J. C. Legros 455

Holographic interferometry near gas/liquid critical points: results of Spacelab D-1
H. Klein and K. Wanders 463

Oscillatory growth: 1-D numerical non-linear stability analysis
Bernard Zappoli 467

A proposed comet nucleus penetrator for the Comet Rendezvous Asteroid Flyby mission
B. L. Swenson, S. W. Squyres and T. C. D. Knight 471
Results and communications considerations of the very long baseline interferometry demonstration using the tracking and data relay satellite system
G. S. Levy, C. S. Christensen, J. F. Jordan, R. A. Preston, C. D. Edwards, R. P. Linfield, S. J. Di Nardo, L. Skjerve, J. S. Ulvestad, T. Hayashi, T. Nishimura, T. Takano, T. Yamada, T. Shiomi, H. Kunimori, N. Kawaguchi, M. Inoue, M. Morimoto, H. Hirabayashi, B. F. Burke, A. Whitney, D. L. Jauncey, C. H. Ottenhoff, K. Blaney and W. Peters 481
Multibeam effects on satellite communication system
Kozo Morita, Makoto Kawai and Sadaatsu Okasaka 489
Ku-band wave propagation and communication experiments using SIRIO-1 satellite in Beijing Earth station
Jiasheng Wang, Aldo Paraboni and Mario Mauri 497
Elements of a Mars transportation system
Kerry T. Nock and Alan L. Friedlander 505

NUMBER 8

Balloons for Mars missions
Jacques Blamont 523
A simulation model for the analysis of Space Station gas-phase trace contaminants
Dana A. Brewer and John B. Hall Jr 527
ACADEMY TRANSACTIONS NOTES
A modular propulsion system for the interorbital vehicle
E. Igenbergs and M. Kirschner 545
A further analysis about the liquid-propellant thermal antimatter engine design concept
G. Vulpetti 551
On the onset of the oscillatory regimes in Marangoni flows
Rodolfo Monti 557
Non-axisymmetric effects on long liquid bridges
J. M. Perales 561
Bidimensional liquid bridges in a gravity field
I. Martínez and J. M. Perales 567
One-dimensional linear analysis of the liquid injection or removal in a liquid bridge
J. Meseguer and A. Sanz 573
Remote sensing technologies for space missions in the second half of the nineties' decade
M. M. Sokoloski and B. Rubin 577
Space-based servicing
Leslie A. Wickman 583
Antarctic communication
M. R. Nayak 587
EX MUNDO ASTRONAUTICO
In Memoriam—Jaroslav Koženík 593

NUMBER 9

SPECIAL ISSUE

SPACE STATIONS

Preface i

PART 1. SYSTEM DESIGN IMPLEMENTATION AND INTERNATIONAL ISSUES
R. MORY, EDITOR

NASA and the Space Station: current status
Thomas L. Moser 595

Columbus, present programme status
F. Engstrom and G. Altmann 601

JEM present project status
Y. Morishita, N. Saito and M. Saito 615

Eureca: European user-friendly retrievable carrier
K. Sommer and W. Koehler-Naumann 621

The Columbus Attached Pressurized Module: system and management aspects of international cooperation
Romano Barbera 627

The passive attitude motion of the orbital stations Salyut-6 and Salyut-7
V. A. Sarychev, V. P. Legostaev, V. V. Sazonov, M. Yu. Belyaev, I. N. Gansvind and T. N. Tyan 635

PART 2. SYSTEM AND SUB-SYSTEM ENGINEERING AND TECHNOLOGY
D. WENSLEY, EDITOR

Space Station information system: concepts and technical challenges
R. B. Williams, David Pruett and Dana L. Hall 641

A packetised remote visual access data system for Space Station interactive payload operations
R. P. Carvell 651

Central processing unit for fault tolerant computing in Columbus
Mats Svenningsson 661

Space Station evolution: planning for the future
Alphonso V. Diaz and Barbara S. Askins 667

Space Station propulsion system technology
Robert E. Jones, Phillip R. Meng, Steven J. Schneider, James S. Sovey and Robert R. Tacina 673

Man in space
V. A. Solovjev 685

PART 3. OPERATIONS AND SUPPORT
K. DOETSCH, EDITOR

Space Station program implications from the viewpoint of the Space Station operations Task Force
Granville E. Paules, Peter Lyman and Carl B. Shelley 689

Trades and problems in the definition of the Columbus operation concept
Giuseppe Giampalmo and Jochen Graf 697

The beginning of the Mir station active operation
Yu. P. Semyonov 703

Assembling, maintaining and servicing Space Station
K. H. Doetsch, H. Werstiuk, W. Creasy and R. Browning 707
European retrievable carrier Eureca servicing by Hermes
L. Kerstein, J. Dettmer and W. Rath 713
Experience of the Salyut-7 propulsion system (PS) repair operations
V. S. Ovchinnikov 719

PART 4. USER ACCOMMODATIONS
J. SIMON, EDITOR

Looking ahead: science requirements for the U.S./International Space Station
Peter M. Banks 725
A data base approach towards Columbus payload accommodation
J. Fromm and G. Golz 731
Problems of control arisen during the implementation of scientific research program onboard the multipurpose orbital stations
V. V. Ryumin and M. Yu. Belyaev 739
The potential of Columbus element utilisation
J. J. Dordain 747
Medical problems of manned space flights onboard orbital stations
O. G. Gazenko, A. D. Egorov, K. K. Ioseliani, V. I. Makarov, I. G. Popov and E. G. Shulzhenko 757

NUMBER 10

International Academy of Astronautics
25 years (1960–1985)

Publisher's introduction
I. R. Maxwell I
Note by guest editor
F. I. Ordway III III
Preface
F. C. Durant III and V. N. Sokolsky V
Introduction
G. E. Mueller XIX
The role of history in the Academy
V. N. Sokolsky 761
Conception, birth and childhood
L. R. Shepherd 763
Evolution of the statutes and membership of the International Academy of Astronautics
V. Kopal 771
Building the organisation: structure, programmes and activities
F. I. Ordway III and M. Claudin 779

NUMBER 11

Preliminary orbit determination using satellite-to-satellite limited range and range-rate data
Robert D. Culp and Lin-Sheng Jin 807
Macro-measurements concept: a tool for specification of radio-localisation systems
O. Zarrouati 813

Orbit and attitude control of a geostationary inertially oriented large flexible plate-like spacecraft
C. K. Rajasingh and Shashi K. Shrivastava 823
A preferred coordinate system and the associated orientation representation in attitude dynamics
S. R. Marandi and V. J. Modi 833
Launch vehicle trajectory optimization
V. Adimurthy 845
Feasibility study on linear-motor-assisted take-off (LMATO) of winged launch vehicle
Makoto Nagatomo and Yoshihiro Kyotani 851
Numerical studies of fluid oscillation problems by boundary integral techniques
H. M. Dürr and J. Siekmann 859
Charging and discharging of dielectric films irradiated by high-/medium-/low-energy electrons
Yang Zhaoming, Zhou Yanping and Ge Reihong 865
A Get-Away Special experiment to measure the carbon dioxide content of the Earth's atmosphere
H. J. Bornemann and S. Seidel 871
The Landsat sensors: EOSAT's plans for Landsats 6 and 7
Jack L. Engel 879
Atomic oxygen simulation and analysis
R. K. Cole, R. G. Albridge, D. J. Dean, R. F. Haglund Jr, C. L. Johnson, H. Pois, P. M. Savundararaj, N. H. Tolk, J. Ye and A. F. Daech 887
A concept of the Energy Storable Orbital Power Station (ESOPS)
Ryojiro Akiba, Tadashi Takano and Hiroki Yokota 893

ACADEMY TRANSACTIONS NOTES
Synthesis of control laws for optimally designed large space structures
K. Satyanarayana and P. M. Bainum 901
Thermal deflection of a deployable and retractable structural mast
Ruth Whang Cholvibul 905
Elastic waves propagation in bounded periodic structures
S. Sgubini, F. Graziani and A. Agneni 913
Fracture control technology for present and future manned space programmes
G. G. Reibaldi 919
Analytical computations for damage tolerance evaluations of composite laminate structures
A. de Rouvray, A. Haug and C. Stavrinidis 921
Remarks on multifunction, or "combined" propulsion systems
M. Barrere 931
On the use of solar energy for the acceleration of bodies to cosmic velocities
V. P. Korobeinikov 937
Space electronuclear generator studies in France
C. Poher and J. Delaplace 941
Estimated corrections for the atmosphere in remote sensing problems
D. A. Usikov and M. N. Fomenkova 945
Satellite remote sensing imagery in public health
Petar Jovanović 951
Impact of modulation on optimization of ground terminal and mobile satellite payload
Nizar Sultan, W. F. (Tory) Payne and D. Randolph Carter 955

EX MUNDO ASTRONAUTICO 959

NUMBER 12

Elegant propositions of the boundary-value problem
Richard H. Battin 965

High-thrust and low-thrust two-stage LEO-LEO transfer
Giovanni Vulpetti and Rosa Maria Montereali 973

Continuous path control of space manipulators mounted on OMV
Yoji Umetani and Kazuya Yoshida 981

A procedure for calculating the damping in multi-element space structures
Edward F. Crawley and Kevin J. O'Donnell 987

Thermoelastic characteristics testing on Kevlar samples for spacecraft structures
L. Balis Crema, R. Barboni, A. Castellani and I. Peroni 997

A new generation of space engines
Adam Siebenhaar 1001

Operational life improvement of SSME high-pressure turbopumps
James R. Hale and Byron K. Wood 1009

A new approach to optimum sizing and in-orbit utilization of spacecraft photovoltaic power systems
M. S. Imamura and B. H. Khoshaim 1019

G-300, the first French Getaway Special microgravity measurements of fluid thermal conductivity
J. C. Perron, P. Chretien, C. Garnier and N. Lecaude 1029

The evolution of a serviceable EURECA
J. Weydandt, H. P. Richarz, H. Wartenberg and L. Kerstein 1035

ACADEMY TRANSACTIONS NOTES

Tether applications: note on an article by J. A. Carroll
K. Rawer 1051

Dynamics and control of the tethered satellite system in the presence of offsets
P. K. Lakshmanan, V. J. Modi and A. K. Misra 1053

Hybrid boosters for Ariane 5
R. E. Lo and E. Dargies 1059

Numerical modelling of the interface conditions in coupled Marangoni flows
C. Golia and A. Viviani 1063
